Pre−post change within the two developmental cohorts
Points show mean posttest−minus−pretest change; whiskers show 95% confidence intervals
ln(k)
Between−cohort change difference: p = .109
Pre−adolescent cohort (recruited in Grade 4, n = 104)
Middle−adolescent cohort (recruited in Grade 8, n = 126)
Change = +0.37; paired p = .028
Change = +0.75; paired p < .001
